Guide for disabling user-id

A user-id can be disabled by entering a date in the field "Gældende til" (Valid until).

A user-id can not be deleted from DAP. When there is a date older than 7 months in the field "Gældende til" (Valid until) on a user-id, the user-id is no longer displayed in DAP.

NOTE: If there are DAP-administrator rights (profile 200) on the user-id, these rights must be removed by CPR Servicedesk by creating a ticket in [CPR Servicedesk](#).

Disabling user-id:

1. Log on with your DAP-administration user-id here: <https://gws.cpr.dk/cpr-online-gws>
2. Click 'DAP' and afterwards 'Personkode' (user-id) in the menu to the left
3. Type in the user-id, which needs to be disabled
4. Click 'Send' in the dark blue line above
5. In 'Aktion' (Action) click 'Ret Personkode' (update user-id)
6. Fill in 'Gældende til' (Valid until) with the relevant date (today or in the future) in the format: DDMMYYYY
7. Click 'Send' in the dark blue line above.

The user-id is disabled from the date and forward.
